

GEMIT

Gem inspection tools

Project details

GEMIT - What is it?

Idea

Tools

All tools designed by our team are dedicated to traders who want to make their life easier and focus on maximize profits from trading

Utility token

Token with real use cases in an application

- Unlock premium features
- Payment for ads
- Payment for token boosts
- Allows to request and vote for additional features

Tokenomics

GEMIT.app token is a deflationary token

100 mln - Total supply

25 mln - Init burn

1% burn

3% to holders

5% to liquidity

Anti whale:

1% - Max per address

1% - Max in one transaction

Roadmap

First public project
release (Alpha)

GEMIT token presale
Stabilize GEMIT Alpha

Release Gemit V2
Grow Community
Launch Marketing
Introduce strategic partners

Continue development
Start building community
GEMIT token first announcement

Design Gemit V2
Stabilize Gemit Alpha

Maintain grow
Continue development
Expansion to the next
chains

Wallet inspection tool

Gemit tools allow anyone to inspect any wallet in the BSC network.

To do so, you only need to know the wallet address which can be obtained from bscscan site or similar source

After inspection completed, the system will continuously update the wallet status by checking all assets quantity and price.

The tool also will listen for any new transactions performed by this specific address

Inspection result:

- Wallet summary
- Assets summary
- Assets details
- Transaction details

Whale tracker

Gemit tools allow anyone to track and receive information as soon as any operation on tracked account appears.

You like some wallet and want to receive information as soon as any new operation appears? Add this wallet to the tracking and tool provide this information as soon as any appear.

Whale tracker result:

- Information about new operation
- Information about operation type
- Detailed information about operation (Tokens, prices etc.)

Token event listener and price alerts

Token event listener:

- Receive information about new tokens
- Receive information about LP modification
- Receive information about the ownership change

Price alerts:

- Set price alerts for wallet assets
- Receive price as soon as the threshold of alert will be obtained

Token details

GEMIT.app token is a deflationary token

100 mln - Total supply

25 mln - Init burn

1% burn

3% to holders

5% to liquidity

Anti whale:

1% - Max per address

1% - Max in one transaction

Address:

[0xa91a840ee787bb773922f961b6c5cd2a564f535d](https://www.gemita.com/0xa91a840ee787bb773922f961b6c5cd2a564f535d)

Token distribution

**Presale include DxSale Tax + ~6% of "Fix" for pancake issue
Tokens not used for "Fix" are locked forever in presale contract**

Project wallet explanation

Project wallet details:

~12% Total supply (About 750k used for DxSale fix)

Marketing - 2 000 000 GEMIT

[0x63879Fe8CB5e96013a7F03d5865b31a44DC17948](https://etherscan.io/address/0x63879Fe8CB5e96013a7F03d5865b31a44DC17948)

Maintenance - 6 000 000 GEMIT

[0xd1abc04fd9a0ff2031dd589a39259f54f0de1708](https://etherscan.io/address/0xd1abc04fd9a0ff2031dd589a39259f54f0de1708)

(Locked with access to the reflection > 6 MLN)
